GREETINGS FROM THE PRESIDENT

We will repay patients’ trust
with constant innovation and challenges
for a healthy society.

Founded in 1968, Kangbuk Samsung Hospital has provided high-quality medical services and now it is taking a new leap towards a “100-Year Hospital” beyond 50 years of its history.

We offer the best medical services through various specialized centers and clinics including Diabetes Center, Breast & Thyroid Cancer Center, Gastrointestinal Cancer Center, Musculoskeletal Diseases Center, Prostate Center and so on.

Kangbuk Samsung Hospital has spearheaded in public health by introducing advanced medical practice through active cooperation with leading hospitals such as Johns Hopkins Hospital in the U.S., BBDC in Canada. In recognition of the importance of preventive medicine, we opened Korea’s first Total Healthcare Center.

During the 55th anniversary, we newly established our brand identity. All employees came together to redefine the hospital’s mission, vision, and core values, leading the way for change. Through this process, we also defined our core talent principles-Humanity, Tenacity, Positivity a foundation for all members to share the same vision and dream for the future.

Having devoted itself to building a healthier society, Kangbuk Samsung Hospital has now become an Urban Total Medical Complex.

With outstanding infrastructure and advanced medical expertise, we will continue to do our best to ensure patient satisfaction and swift recovery-repaying our patients’ trust through continuous innovation and challenges.

President of the Kangbuk Samsung Hospital
Hyunchul Shin 신현철

Patient-Centered Healthcare Towards 100-Year Hospital

Kangbuk Samsung Hospital was founded on November 2, 1968 with a slogan "The Best Hospital in Korea." Equipped with cutting-edge facilities and best medical staff, we have a seven-floor building and one basement level with 2,362 pyeong of floor space. It has become an advanced medical institution that combines medical treatment, education, and research. As part of the Samsung Medical Center, its competitiveness has been enhanced by being incorporated into the Samsung Group and designated as the educational hospital for School of Medicine, Sungkyunkwan University. Kangbuk Samsung Hospital will be committed to realizing our vision "Patient-centered Healthcare towards 100-Year Hospital."

Kangbuk Samsung Hospital Vision & Mission

MISSION

Diabetes Center

At Kangbuk Samsung Hospital's Diabetes Center, we have established a specialized treatment system designed around the clinical needs of our patients, focusing on early diagnosis and the effective prevention of complications.

Korea's top specialized center
for diabetes and vascular diseases
providing personalized total treatments

Diabetes Team Offers effective and diverse treatments for patients with diabetes who need lifelong care
Personalized treatments with one-stop care, artificial pancreas clinic, and home care programs

Cardiovascular Team Offers integrated treatments of cardiovascular complications with great teamwork
Interdisciplinary Treatment System of Cardiothoracic Surgery, Thoracic & Cardiovascular Surgery, and Nephrology

Cerebrovascular Team Operates FAST-ER system to keep golden time
Systematic and scientific treatments by skilled specialists in Neurosurgery, Neurology and Radiology

Specialized Clinics

Intensive Care	Providing the latest personalized diabetes treatment through a multidisciplinary cooperative system involving the Endocrinology, Surgery, and Nutrition teams
Obesity Surgery	General Surgery, Family Medicine, Endocrinology Surgical treatments of obese diabetes
Sexual Dysfunction	Urology Medication and urological treatments
Mental Health	Mental Health Medicine
Rehabilitation	Rehabilitation Medicine

Breast & Thyroid Cancer Center

Kangbuk Samsung Hospital consists of best medical teams with experienced specialists in Korea to quickly cope with and treat breast cancer, thyroid cancer, and adrenal cancer. The Breast & Thyroid Cancer Center has minimized treatment time with a one-stop system for patients by locating consultation and examination room in a single space. As a reliable partner to improve patients' health, we will develop a variety of programs that integrate patient-centered treatments, research and education.

Patient-centered specialized center
with prompt and advanced treatments

One-stop Treatment System

A one-stop system reduces the number of visits to the hospital by enabling consultation and examinations to be done at a single location. The latest equipment and professional personnel are operated to shorten the waiting time after consultation.

Cutting-edge facilities to satisfy patients

With high-resolution ultrasound equipment and 3D breast tomography, we make an accurate diagnosis. Special tests using stereotaxy, vacuum assisted breast biopsy and thyroid hyperthermia are available. We improve patients' satisfaction by accurately treating narrow and deep areas and reducing pain and scars with state-of-the-art robots for thyroid and adrenal surgeries.

Educational programs and referral system

Training courses for medical staff in local hospitals are held to enhance their competence every year. In partnership with affiliated hospitals, patients are connected to outpatient care to have optimal treatments after a thorough examination.

Surgery within two weeks after cancer diagnosis

Our streamlined system allows patients to undergo a surgery within two weeks after the diagnosis of cancer.

One-on-one counseling with personal coordinators

Before and after surgery, a coordinator in charge arranges examinations and provides counseling to satisfy patients and their families.

Training program for patients

A training team consisting of doctors, nurses, and nutritionists provides detailed and easy post-operative education for patients on chemotherapy, radiation therapy, hormone therapy, kinesitherapy, lymphedema management, and nutrition therapy.

Healing Programs for Patients with Cancer

We organize a program for the group of patients with breast cancer (Hanmaeum Association) and art psychotherapy programs for psychological stability.

Convenience for patients by network with healthcare center

The service with the connection of its Total Healthcare Center enables prompt examination.

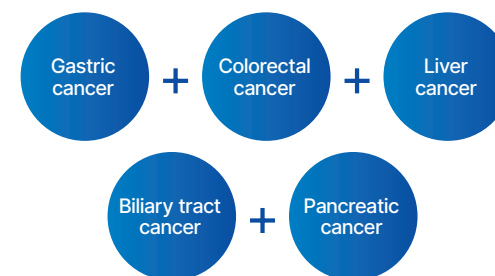

Gastrointestinal Cancer Center

The Gastrointestinal Cancer Center of Kangbuk Samsung Hospital has treated patients with gastrointestinal cancer that develops most frequently among Koreans to increase their survival rate after treatments. Gastroenterology, Gastrointestinal Surgery, and Oncology and Hematology departments are located in a single space. We boast multidisciplinary treatments by professional medical staff who make decisions on surgeries and procedures to take full responsibility for patients with trust. We compassionately provide the best medical services with a prompt treatment system.

Specialized gastrointestinal center
responsible from the beginning of treatments
to a healthy daily life

One-stop Treatment System (1-3-7 Service)

We established 1-3-7 Service: confirm disease in one day, have surgery in three days, and discharge in seven days. This one-stop service allows patients to be diagnosed and treated in one place on the same day.

Clinic for Inflammatory Bowel Diseases

Professional nurses provide continuous care for patients with inflammatory bowel disease from pre-interview to post-treatment. Patients can receive feedback from the medical staff when they ask a question via social media.

Resident Nurses for Explanation and Counseling

Specialized nurses in gastroenterology provide one-on-one counseling to patients for all aspects from post-surgery precautions to meals. 4,000 cases of counseling are conducted every month for patients to have the best treatment experiences.

Special Service for Patients with Gastrointestinal Cancer

A multidisciplinary system has been built to provide rapid, accurate, and convenient medical services from the diagnosis to treatments and follow-up management. Each team for colorectal cancer, gastric and esophageal cancer, and liver cancer, pancreatic cancer and bile duct cancer is composed of professors of Gastroenterology, Gastrointestinal Surgery, Oncology, Radiology, Nuclear Medicine, Pathology and Thoracic & Cardiovascular Surgery.

Elaborate Robot Surgery with Faster Recovery

Robot surgery's elaborate lymph node dissection and improved visibility facilitate nerve preservation, reduce pain and bleeding, and minimize complications. Early recovery allows patients to return to their daily lives promptly.

Experience of More Than 1.4 Million Cases of Gastrointestinal Endoscopy and Procedure

The best and experienced medical staff in gastrointestinal endoscopy in Korea, quickly and accurately identify the diseases and seamlessly treat patients.

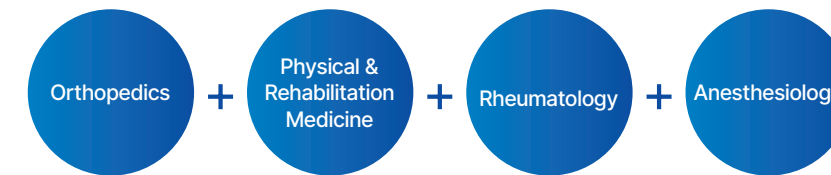

Musculoskeletal Diseases Center

The Musculoskeletal Diseases Center was established to cure musculoskeletal diseases of modern people and has offered multilateral treatments in close cooperation with Orthopedics, Rehabilitation Medicine, Rheumatology and Anesthesia Pain Medicine. It allows systematic and professional treatments of musculoskeletal diseases such as trauma, slipped disc, and arthritis, persistent neuropathy, intractable musculoskeletal diseases and pain. In particular, our "All In One Spot" system enables doctors to identify the cause of individual diseases by working closely together and provide appropriate treatments with patients in one place.

Pinpoint the cause of disease
and provide patient-tailored treatments
All In One Spot

Orthopedics, Best Treatments by Each Specialist

Best treatments offered by specialists in spine, hips (hip joints), knee, shoulder, elbow, hands, and feet

Rehabilitation Medicine, Non-Surgical Treatment Techniques based on Precision Diagnosis

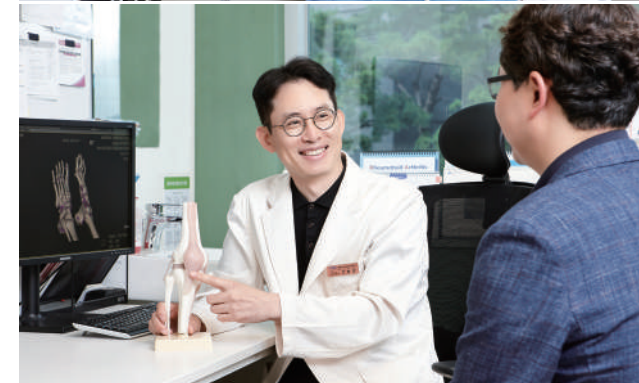

We make an accurate diagnosis of musculoskeletal pain, multiple pain, chronic pain, neuropathic pain with precision diagnostic devices including electroneuromyography, ultrasonography, infrared thermography and musculoskeletal function examination. Likewise, we provide professional treatments with non-surgical techniques such as C-arm guided nerve block, ultrasound-guided injection, extracorporeal shock wave lithotripsy and orthosis, let alone rehabilitation treatments including myofascial release therapy, posture correction and customized exercise therapy.

Rheumatology, the Latest Medications

With the latest medications, we quickly diagnose common musculoskeletal diseases(osteoarthritis, gout) and autoimmune diseases(rheumatoid arthritis, ankylosing spondylitis, lupus, systemic sclerosis, vasculitis)

Anesthesia Pain Medicine, Effective Pain Relief with Various Treatments

The causes of various pains are accurately analyzed and treatment methods are decided based on physical examinations and check-ups. In order to relieve musculoskeletal and neuropathic pain, we carry out treatments with ultrasound-guided injection, nerve block using imaging devices, and other multiple procedures. Multilateral and active treatments for muscles, ligaments, and nerves that cause pain are provided.

Prostate Center

The Prostate Center of Kangbuk Samsung Hospital treats a variety of urinary diseases with one-day prostate clinic and multidisciplinary treatments with Oncology and Hematology and Radiation Oncology to satisfy patients by professional medical staff under the department of Urology. In particular, we perform “personalized surgeries” reflecting individual characteristics and find the best treatment methods. Total services from diagnosis, surgeries, treatments to post-treatment management are provided in communication with patients.

Prostate Center
offering total services
from diagnosis, surgeries,
treatments to post-care

Patient-tailored Surgical Method

We perform patient-tailored surgeries through robot, perineal incision, and ventrotomy. Safe and effective treatments are provided with transurethral prostatectomy and holmium laser prostatectomy depending on the size and condition of prostate.

One-day All Care Service

Diagnoses, examinations, and result counseling sessions are carried out on the same day. It is a patient-centered service that the physician in charge directly examines and decides on treatments with blood tests, uroflowmetry, prostate ultrasound, and rectal examination on the day of visiting the hospital.

Systematic Treatments with Multidisciplinary Cooperation

We are devoted to finding optimized treatment methods for cancer diagnosis, surgery, radiation therapy, and post-cancer management with a multidisciplinary collaboration system among medical staff in Urology, Oncology and Hematology, and Radiation Oncology.

Life companion for healthy 100 years Total Healthcare Center

The Total Healthcare Center of Kangbuk Samsung Hospital has provided world-class medical techniques and innovative services with 40 years of expertise since its inception in 1981. It has established itself as both Korea's first total healthcare center and the world's largest healthcare center with the most advanced, reliable and impressive medical services.

01 First and Largest Healthcare Center in Korea

We have offered medical check-up service since 1981 by introducing the concept of total health examination for the first time in Korea. A great number of patients have benefited from this largest scale and advanced healthcare complex.

02 High-tech Examination Equipment

Cutting-edge medical equipment including specialized PET-CT, MRI, MDCT and sonogram and advanced medical system enables prompt and accurate examination.

03 Optimized Healthcare Environment

New spatial layout in consideration of health, relaxation and privacy improves convenience for customers.

04 Best Medical Staff in Each Field

Professional medical staff with the best caliber in each field provide one-stop coordination service from health check-up to treatments.

05 Smart Healthcare System

The healthcare system applying advanced IT contributes to simpler and convenient healthcare services.

06 Leading the New Paradigm

We provide differentiated services of mental health promotion for businesses and workers based on multiple in-depth research conducted by specialized research institutes including the Corporate Institute of Mental Health and the Corporate Institute of Health. At the same time, we offer health promotion consulting and design healthcare program by analyzing examination results.

Korea's best medical check-up institution for workers

Preventive Healthcare Center

The Preventive Healthcare Center of Kangbuk Samsung Hospital is Korea's No.1 healthcare center where over 200,000 people have examinations each year. We provide medical check-up services for workers and a national cancer screening program based on multidisciplinary system for screening, diagnosis, treatment, and physical check-up by specialists in Occupational and Environmental Medicine, Gastroenterology, Radiology, Obstetrics & Gynecology and Dental Clinic. Recognized as the best healthcare center at home and abroad, we achieved a top "S" grade for five consecutive years in evaluation of special medical check-up institutions.

Types of Preventive Healthcare Examination

NICE HOSPITAL TO EVERYONE

A future urban hospital
where all patients, medical staff, and community feel happiness

Kangbuk Samsung Hospital VIP Ward Guide

A New Standard of Medical Service

Located on the 14th floor of Building B, the VIP Ward is more than just a luxury patient room—it represents an entirely new concept of medical space. By integrating AI and IoT technologies, it provides patients with the comfort of home and the safety of advanced medical care.

A Special Space Filled with Warmth

Soft linear lighting naturally guides movement along the hallway, while calm-toned finishes create a serene atmosphere. Each suite offers separate living and bedroom areas for privacy, designed with warm wood tones and gentle curves to convey both comfort and sophistication. Premium stone textures, natural light, and beige-toned interiors complete an environment designed for genuine rest and relaxation.

Next-Generation Smart Healthcare Environment Powered by AI and IoT

Patients can personalize their lighting color and brightness to their liking, while the in-room air dresser provides a cozy, hotel-like atmosphere. All rooms feature a tablet system that allows patients to control lighting, temperature, and TV conveniently from their bed. The bathroom safety monitoring system automatically alerts medical staff if no movement is detected for a prolonged period. Wireless wearable biosensors continuously collect vital signs, which are analyzed by AI to detect emergencies early. It is an innovative case of introducing IoT solutions—previously used mainly in residential complexes—into a hospital setting for the first time. The VIP Ward at Kangbuk Samsung Hospital marks the beginning of a new era in personalized, smart medical service.

Kangbuk Samsung Hospital

Giving and Donor Recognition

Donation Programs

Hope Sharing Fund

This fund provides direct financial support—such as medical expenses—for neighbors experiencing economic hardship. Through your warm generosity, we can extend real, practical help to more people in need and give them renewed hope.

Hospital Development Fund

This fund supports the continuous advancement of Kangbuk Samsung Hospital. Your donation contributes to the introduction of cutting-edge medical equipment and the creation of a safer, more comfortable healing environment for patients.

Clinical Department Development Fund

This fund is dedicated to the growth of specific medical departments. It supports talent development, academic research, and infrastructure expansion to elevate medical standards and create a more specialized treatment environment in each field.

Join Us in Building a Healthier Future

Your generosity helps us create a healthier, more hopeful society. All donations are used to support the hospital's growth and to help neighbors in need. Through the Hall of Honor and Donor Wall located in the lobby of Building C, we honor each donor's heartfelt contribution and express our deep gratitude and respect through our donor recognition program.

Highlights of Donor Recognition

Donor Wall

The Donor Wall is a space of appreciation for those who have contributed to Kangbuk Samsung Hospital. The nameplates are designed in varying styles according to donation tiers, reflecting our sincere gratitude and respect for every donor's meaningful support.

Comprehensive Health Checkup

Because your health gives hope to others, we offer a comprehensive medical checkup service for each donor and one family member. **Dignity:** Basic tests including endoscopy **Dignity Precision:** Additional specialized screening such as cancer, digestive, or pulmonary examinations

VIP Concierge Service

We provide personalized assistance to ensure that our donors receive comfortable and convenient service during their visits to the hospital.

Reduced Medical Fees

As a token of appreciation, donors receive a 10% reduction in out-of-pocket medical expenses for their treatments.
